

Dear Hiring Manager,

I am writing to express my strong interest in the RPA Team Manager position at Worldline. With proven experience managing RPA projects using UiPath, demonstrated team leadership capabilities, and stakeholder management skills across multiple organizational levels, I am uniquely positioned to lead a team of RPA developers while driving automation strategies company-wide.

- **RPA Strategy & UiPath Expertise:** In my current role at Medlytix, I develop and implement RPA strategies using UiPath Studio, Orchestrator, and Robot environments for healthcare revenue cycle automation. At Enterbridge Technologies, I successfully designed automation solutions for financial services clients, specifically ACH payment processing to meet critical NACHA compliance deadlines—experience directly relevant to Worldline's payments technology infrastructure.
- **Team Leadership & Resource Management:** I have experience in resource planning, task allocation, and prioritizing opportunities based on business impact while managing 7 concurrent client projects. I managed teams of educators, conducted performance reviews, and provided coaching that achieved a 93% satisfaction rate for professional development sessions.
- **Stakeholder Communication & Project Management:** I work effectively with C-suite executives, process owners, and technical teams to translate business requirements into automation solutions. At Enterbridge Technologies, I participated in sales calls contributing to new business growth while managing complete project lifecycles from discovery through deployment.
- **Governance & Compliance:** My experience implementing HIPAA-compliant automation solutions in healthcare and NACHA-compliant ACH processing demonstrates my ability to ensure governance and compliance for RPA implementations while managing process adaptations and change requests.

Worldline's leadership in payments technology innovation resonates with my experience automating financial services operations. Having implemented automation solutions ensuring NACHA compliance for ACH processing, I understand the critical importance of reliability, security, and regulatory adherence in payments infrastructure.

I am particularly excited about the opportunity to contribute to Worldline's French operations and am prepared to relocate to France to fully embrace this role. My French language background (6 years academic study including literature) and appreciation for the intellectual rigor valued in French business environments make me enthusiastic about this transition.

My unique combination of UiPath expertise, proven team management experience, and payments industry knowledge positions me to immediately contribute to your automation strategies while fostering professional growth of your RPA development team.

I would welcome the opportunity to discuss how my experience directly addresses your requirements and how I can help drive Worldline's automation initiatives forward.

Sincerely,

Emily Pendleton
